

2011 Quantec Titan Survey - 3D Visualization of IP Chargeability isosurfaces for the Stoddard Zone

3-D visualization showing IP chargeability zones (yellow, orange & red) in relation to the drill holes from previous exploration programs (2007-2008). IP chargeability zones (yellow, orange & red) are isoshells interpolated from vertical 2D inversion sections of IP chargeability along the 300 m spaced survey lines.
